## WORK EXPERIENCE

### Jio Platforms Limited

Jul 2022 - Present

Software Development Engineer

- **JioStream** - A Video Commerce SaaS platform - [ Next.js, React.js, Node.js ]
  - **Spearheaded the development of JioStream Studio**, building the platform from the ground up and **successfully migrating** from legacy Admin and Creator portals to a unified, modern system. This included new **end-to-end feature development** such as the Stories feature, widget customisation, and dashboard enhancements, significantly improving functionality and user experience.
  - Took full **ownership of feature deliveries**, overseeing the complete development cycle while **mentoring** junior developers to foster team growth and maintain high-quality standards.
  - **Awarded Most Valued Player** at the **JioMatrix Conference 2023** for my contributions to the JioStream project.
  - **Developed the official team website ([stream.jio](https://stream.jio)) from scratch**, collaborating with designers to implement animations and deliver an engaging, user-centric experience.
  - Implemented a comprehensive **Cataloguing Solution**, building both admin and brand-side portals for product catalog uploads, and creating **Reusable Component libraries** to optimise cross-project development.
- **Reels SDK** - A SDK for Instagram-like reels with video management and content proctoring system - [ Swift, Objective C ]
  - Developed key features for the **iOS Reels SDK** using Swift and Objective-C, achieving a **20% reduction** in SDK size through effective code refactoring and **Performance optimisation**.
  - Created a separate Admin portal for **streamlined content management** and **proctoring**, enhancing the platform's **maintainability**.
- **JioGames Watch** - A content streaming and VOD SaaS platform - [ Solid.js, React.js, React Native, Next.js ]
  - Developed a **multi-portal video streaming platform** using latest technologies for web and **mobile** user consumption, creator content management, and admin control.
  - Optimised platform performance by leveraging **framework-specific strengths** to meet unique client and portal requirements.
  - Implemented features to enable **real-time content updates**, allowing creators to engage with their audience dynamically.

### Namasys Consultants Pvt Ltd.

Mar 2021 - Jun 2021

Frontend Developer - Intern

- Developed web applications, handled web page development, API integration, **client communication**, and application testing.
- Created a **Table Component package** featuring new functionalities to enhance **Data presentation** and user interaction.
